# KEEPING YOUR BUSINESS MOVING

Unexpected breakdowns cost time, money and production. That's why JPML works with businesses across the UK to keep equipment running safely and efficiently.

Whether you need a regular maintenance programme, an engineer to respond to a breakdown or support during a planned shutdown, our experienced team is ready to help. We take pride in delivering practical engineering solutions that minimise downtime and keep production moving.

## PLANNED PREVENTATIVE MAINTENANCE

A well-maintained plant is a more reliable plant. Our Planned Preventative Maintenance (PPM) programmes are tailored to your equipment and operating schedule, helping to identify issues before they become expensive breakdowns.

Our maintenance programmes include routine inspections, servicing, equipment performance checks, lubrication schedules, asset condition monitoring and detailed maintenance reporting, giving you confidence that your machinery is performing at its best.

## REACTIVE BREAKDOWN MAINTENANCE

Even with the best maintenance programme, unexpected failures can happen.

When they do, JPML provides a fast, reliable response. Our engineers quickly diagnose faults, carry out emergency repairs and work efficiently to get your production back up and running. Where a temporary repair is needed to restore operations, we'll return with a permanent solution at the earliest opportunity.

# INDUSTRIES WE SUPPORT

## SUPPORTING INDUSTRY ACROSS THE UK

Over the years, we've worked with businesses across a wide range of industries, each with its own unique challenges.

### OUR EXPERIENCE INCLUDES SUPPORTING:

- Food & Beverage Manufacturing
- Dairy Processing
- Pharmaceutical
- Chemical Processing
- Breweries & Distilleries
- FMCG Manufacturing
- Water & Wastewater
- Biomass & Energy
- Hospitals
- Schools
- Utilities
- Industrial Manufacturing
- Distribution Centres
- Data Centres

Alongside our maintenance services, we also carry out equipment inspections, pipework surveys, condition reporting, maintenance documentation and site audits to help clients improve reliability, safety and long-term performance.

# FABRICATION, WELDING & SHUTDOWN SUPPORT

## FABRICATION **BUILT AROUND YOUR REQUIREMENTS**

Not every project is off the shelf.

JPML provides bespoke fabrication and coded welding services to suit the specific requirements of each client. Whether it's a small bracket, pipe support or a complete fabrication package, we manufacture practical solutions built to last.

Our fabrication services include stainless steel, carbon steel and aluminium fabrication, together with TIG, MIG and MMA welding carried out by experienced engineers.

## SHUTDOWN & **PROJECT SUPPORT**

Planned shutdowns provide the ideal opportunity to carry out essential maintenance, upgrades and installations.

JPML supports businesses during weekend, Christmas and summer shutdowns, completing work efficiently to minimise disruption and help clients get back into production on schedule.

From equipment replacements and production upgrades to plant relocations and factory expansions, we provide the engineering support needed to keep projects moving.

# PIPEWORK & MECHANICAL SERVICES

## COMPLETE PIPEWORK & MECHANICAL ENGINEERING

JPML provides professional pipework and mechanical engineering services for industrial businesses across a wide range of sectors.

Whether it's repairing an ageing steam line, installing new hygienic process pipework or replacing mechanical equipment, every project is completed safely, professionally and to the highest standard.

### WE REGULARLY WORK ON:

- Stainless steel and carbon steel pipework
- Hygienic food and dairy systems
- Steam and condensate systems
- Compressed air installations
- Chilled, heating and cooling water systems
- Chemical dosing and glycol pipework
- Process water systems
- Leak repairs, modifications and new installations

Alongside our pipework services, we install and maintain pumps, valves, heat exchangers, mixers, conveyors, dosing systems and other essential mechanical equipment that keeps industrial facilities operating efficiently.

# WHY BUSINESSES CHOOSE JPML

## RELIABLE ENGINEERING. TRUSTED SUPPORT.

When your business relies on production, you need an engineering partner you can depend on.

JPML has built its reputation by providing honest advice, quality workmanship and a responsive service that clients can rely on whenever they need us.

Whether we're responding to an emergency breakdown or supporting a long-term maintenance contract, our focus is always the same – keeping your plant running safely and efficiently.

## WHY CHOOSE JPML?

- Over 20 years of industry experience
- 24/7 emergency breakdown response
- Nationwide coverage
- Experienced pipefitters and coded welders
- Fully equipped mobile engineers
- Planned, reactive and shutdown maintenance

## GET IN TOUCH

If you're looking for a dependable mechanical maintenance partner, we'd be delighted to discuss your requirements.
